About »

As far back as I can remember, I was always fond of computers and tech which landed me in this field. After taking a few programming courses in high school, I got into the Computer Science program at Ryerson where I spent a couple years learning mainly C and Java. While there, I also learned the basics of After Effects and a bit of 3D on my own. This was something that genuinely appealed to me and led me towards the Digital Media Arts program @ Seneca as I wished to do something a bit more on the creative side.

Digital Compositing is something I plan to do in the near future. Since I have a programming background, I think it will help me quite a bit with this choice as compositing requires quite a bit of problem-solving and deals with a lot of technical aspects.

After Effects • Illustrator • Photoshop • InDesign • Premiere Pro • Final Cut Pro 7 • HTML/CSS • Flash • Cinema 4D • 3D Studio Max • Programming (C/Java/VB.NET)

Skills »

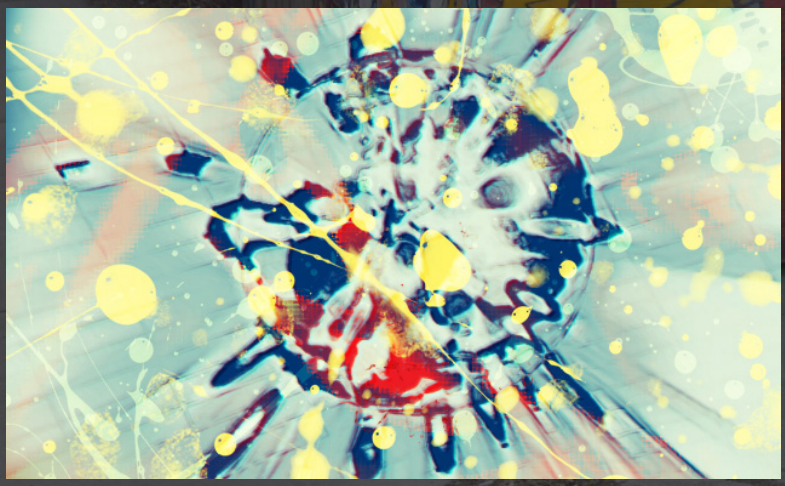

VFX • Motion Graphics • Gaming • Pool • Table Tennis • Programming • Movies/TV • Video Editing • Tech/Gadgets • Science • Reading • Psychology • Photography
